Equity Coverage

Peer Comparison Tool

See the details in midstream oil and gas operations that your competitors could be missing. Bring financial data from over 20 oil and gas companies into a single summary product.

EDA Vs Consensus

Gain unprecedented visibility into EBITDA. Compare our models of midstream companies with those of the consensus and see where our estimates differ the most at a glance.

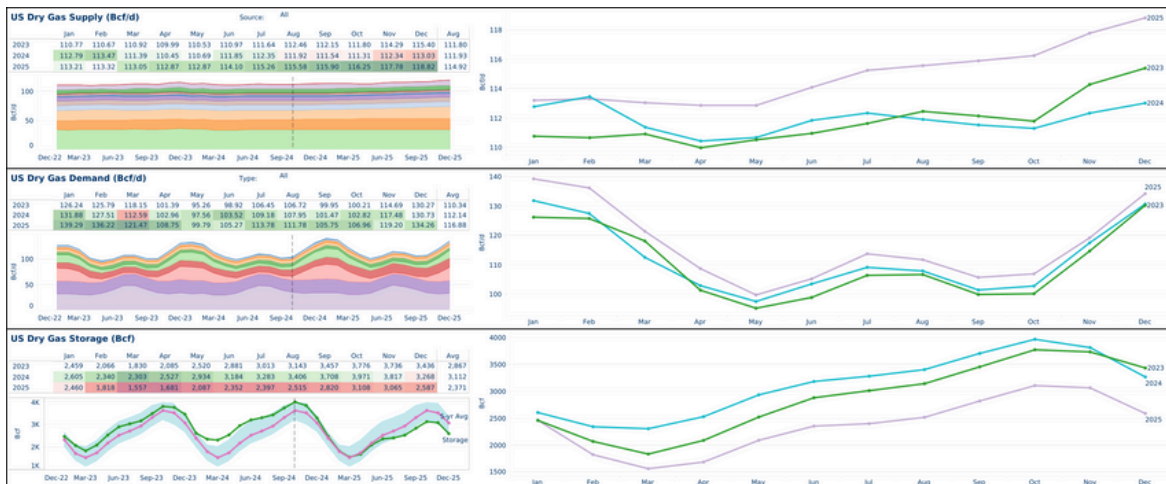

Commodity Data and Reports

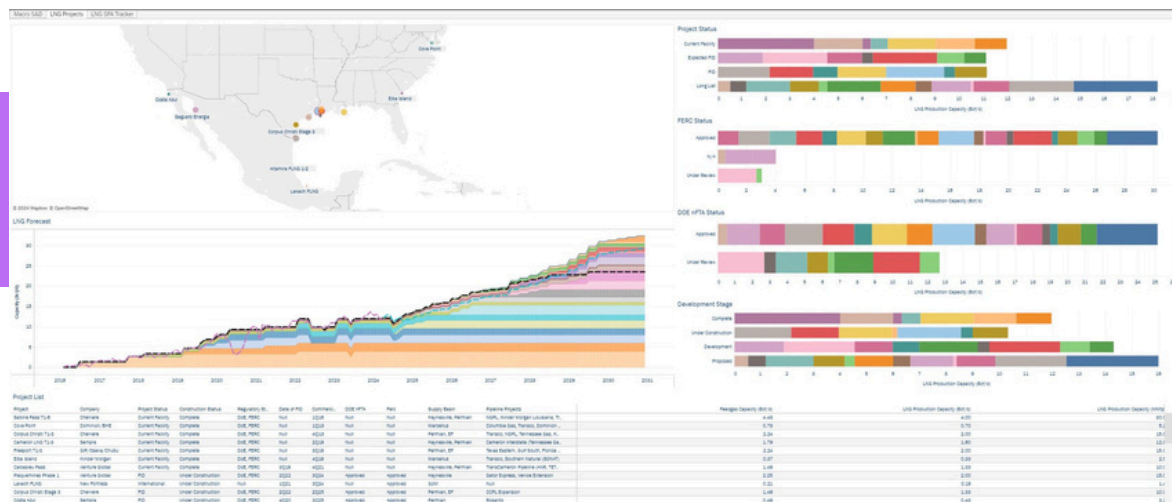

Natural Gas Supply & Demand - Macro and Regional

Connect producers through processing, to pipelines for a complete value chain analysis by basin and region. Gain a comprehensive macro-view with visibility into micro constraints and relationships. Build our LNG data into your own demand forecasts or use it to validate against your own view of the coming LNG super-build.

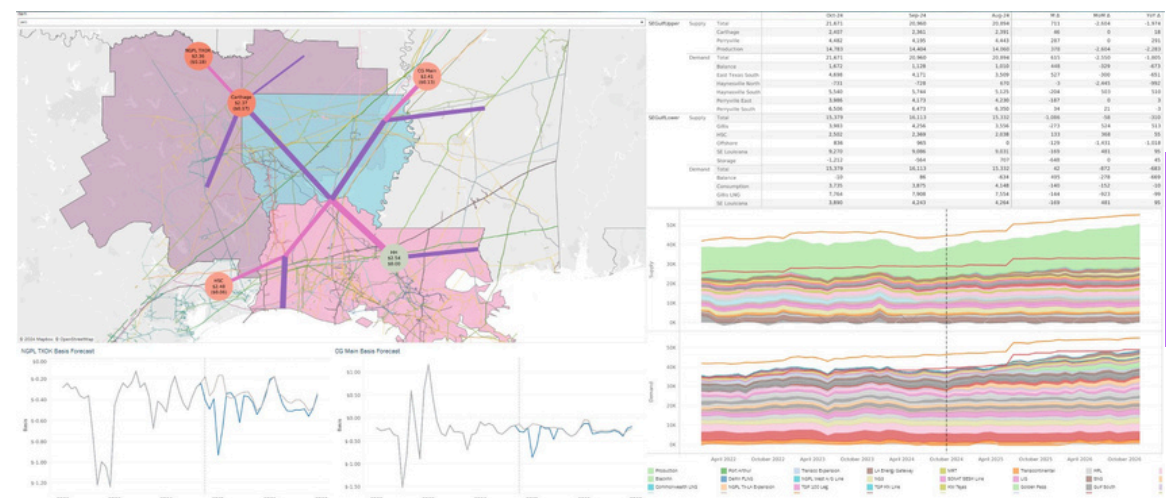

Macro Supply & Demand

LNG Stack

Regional Supply & Demand

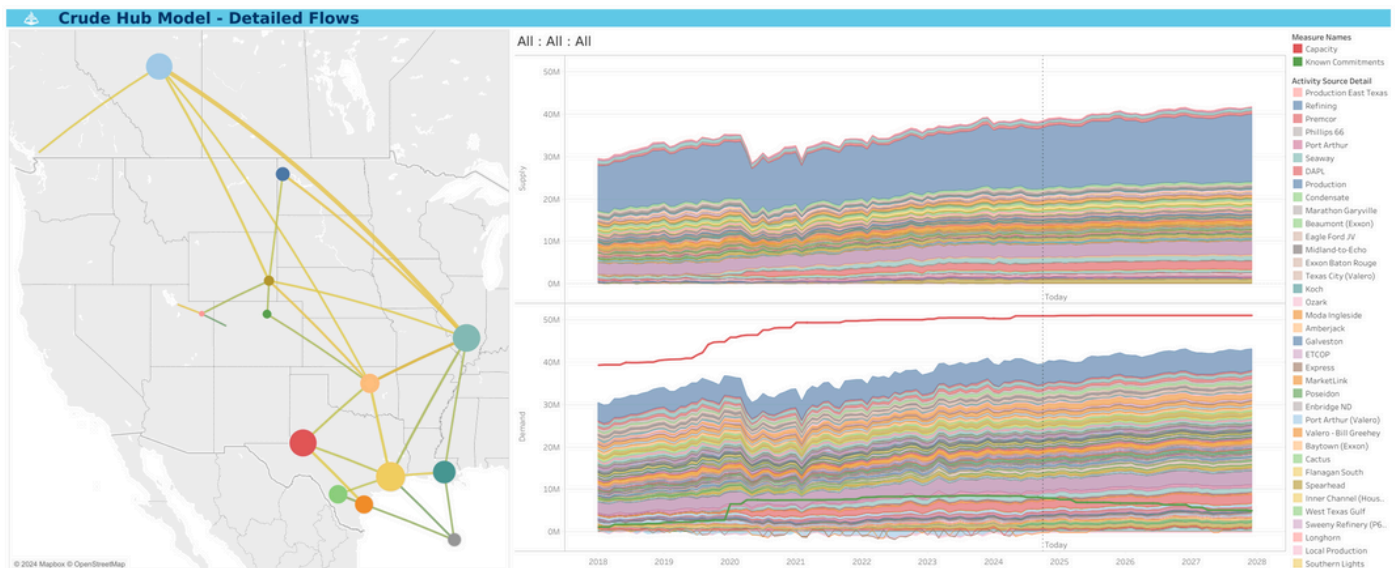

Commodity Data and Reports

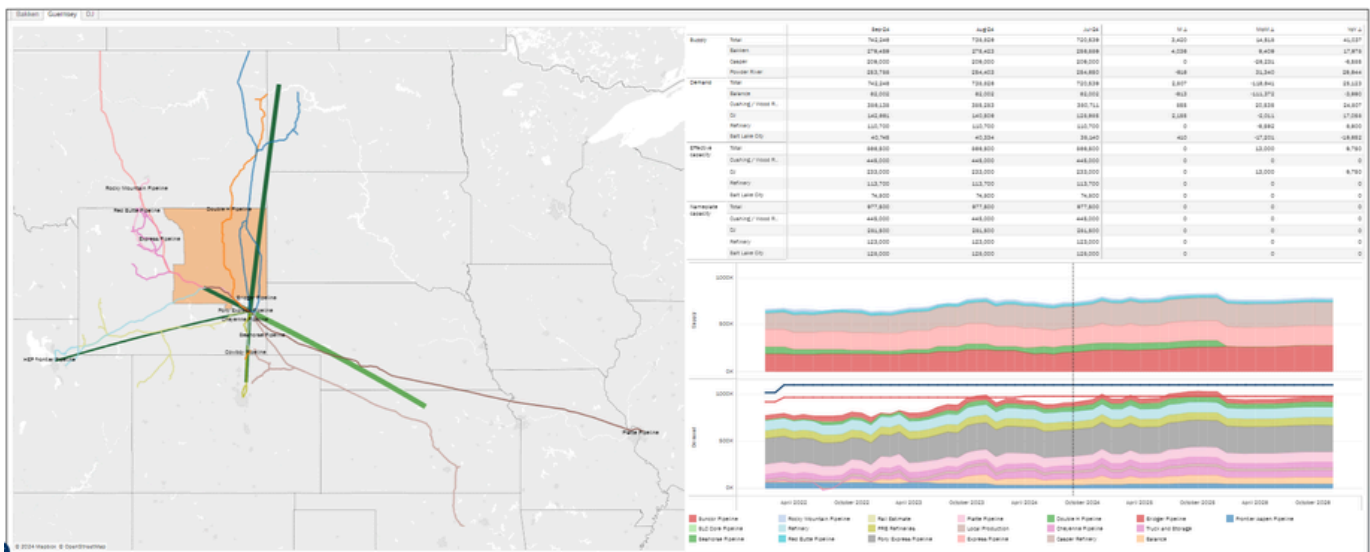

Crude Oil - Crude Hub Model and Supply & Demand

Macro and regional crude oil supply and demand models offer insights into the intricate dynamics of these markets. By accurately forecasting supply, demand, and pipeline financials, you can make informed decisions, mitigate risks, and capitalize on opportunities.

Crude Hub Model

Regional Supply & Demand

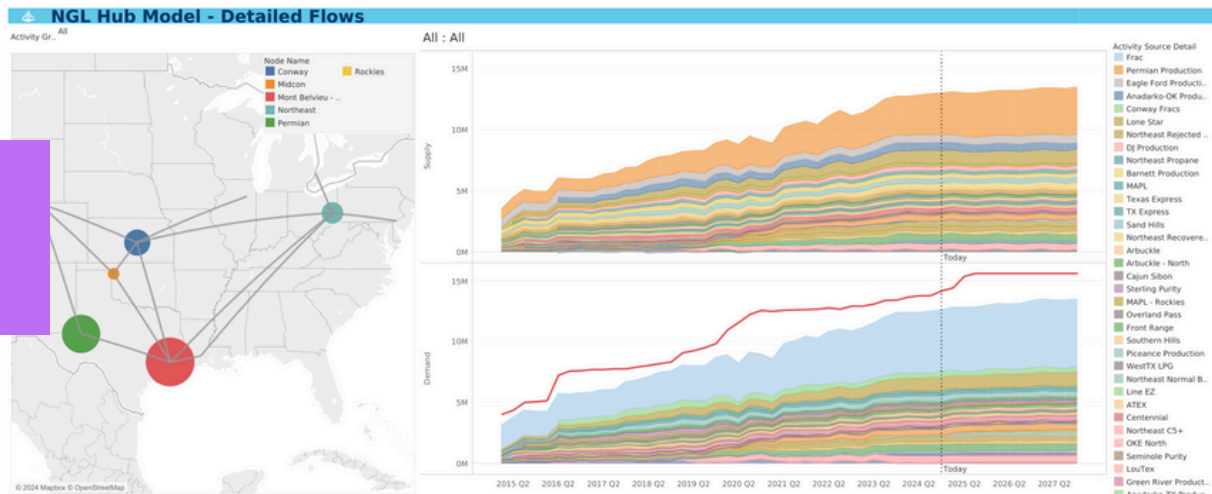

Commodity Data and Reports

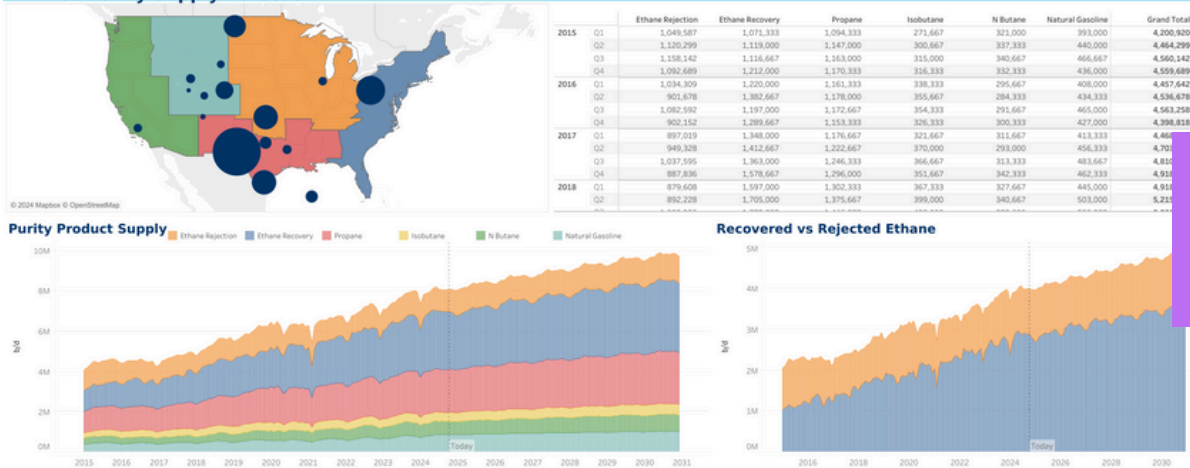

NGL - Hub Model, Purity Supply Forecast and Supply & Demand

Monitor NGL market forecasts and asset-specific insights, follow the chain of NGLs from wellheads to fractionation hubs, and anticipate constraints and shifts in supply dynamics.
